

“With Today’s Breakthroughs, You No Longer Have To Live With Type 2 Diabetes, Obesity or Hypertension!”

Rick Flannery, age 55, started with Dr. Miller in March 2016. When Rick first came to see Dr. Miller he was taking 12 medications a day. He’d suffered from Type 2 Diabetes for 15 years, taking 7 Oral medications and 4 Injections of insulin daily. Rick also suffered from Hypertension for 15+ years, High Cholesterol and was Overweight, weighing over 246 lbs.

After just 4 MONTHS.. his A1c went from 9.2 to 7.1, after treating it for 15 years on medications. Rick has eliminated all meds for Type 2 Diabetes, Hypertension and Cholesterol and he’s now lost 58 pounds!

Q: Rick, why did you go to Dr. Miller?

A: “I had heard of Dr. Miller and the results he gets. My Type 2 Diabetes was very bad and my health was getting worse. I had Diabetes for about 15 years and was up to 7 oral drugs and 4 injections every day. My A1c was 9.2 and it continued to go up. I had High Blood Pressure for over 15 years and I really needed to lose weight, but couldn’t.”

Q: You’ve been seeing other medical doctors for your Type 2 Diabetes and Hypertension, what was it about Dr. Miller that was different?

A: “Dr. Miller made it clear, something was not working correctly in my body and he made it very clear that his approach is to uncover and reveal exactly what that is. Dr. Miller shared how something had happened inside my body, something was just not working like it had done for my first 40 years. Dr. Miller really takes the time to listen and looked at my whole health history. He makes it very clear that Type 2 Diabetes, Hypertension and Obesity are being caused by something. My other doctors just didn’t take the time to do this, they never even talked about what was causing any of these. From the other doctors, all I got was more and more medications. I knew these were just masking symptoms and

not fixing anything. Dr. Miller made complete sense to me.”

Q: What did Dr. Miller do to find out what was not working correctly inside you?

A: “Dr. Miller doesn’t mess around. He has an amazing blood panel lab he orders through Lab Corp. After he gets the results, he does a ‘Functional Medicine’ computer assessment that uncovered exactly what was causing my Type 2 Diabetes and High Blood Pressure. It is very impressive.

Q: After Dr. Miller finds what is not working correctly, then what?

A: “Dr. Miller just goes over everything so I clearly understood. He really takes the time to make sure I understood everything and how it needed to be corrected. He just takes the time to show what exactly needs to be done, his approach and what type of natural treatment he recommends in order to fix what is causing my Type 2 Diabetes, my Hypertension and my Obesity. It all makes perfect sense once you see everything in very clear terms.”

Q: Rick, what did Dr. Miller recommend for you to eliminate your Type 2 Diabetes and Neuropathy?

A: “He laid out a very clear plan of care. I had seen so many of the other testimonials.

RICK FLANNERY, BEFORE

AFTER TRUE HEALTH SOLUTIONS TREATMENT

Dr. Miller just lays it all out so clear. He started off by seeing me every week to ensure I would eliminate the Diabetes, and he has amazing instructions on life-style improvements to eliminate poor health and then stay healthy. He just makes it all clear and provides great printed instructions. I’m really happy with how he treats me as a client.”

Q: What are the results of your treatment from Dr. Miller?

A: “My results are great! After just 4 months my A1c went from 9.2 to 7.1, after treating it for 15 years on

medications. My morning sugars range from 100 – 120’s, my blood pressure is normal and I’ve eliminated all my meds for Type 2 Diabetes, Hypertension and Cholesterol and I’ve now lost 58 pounds!

I highly recommend Dr. Miller and his very unique approach that really fixes the causes of so many conditions. I got my health and life back!”
